Preface

mmCEsim documentation & tutorials are under development!

I would like to thank Jinwen Xu for designing the elegant L^AT_EX template beaulivre, which empowers this document.

I

PRELIMINARY

Make preparations before we start.

Preview | 1

Before diving into documentation details, let's first have a preview of mmCEsim. Maybe you are not sure whether your research or study need this powerful tool, then read this chapter to have a glimpse of mmCEsim.

1.1 Introduction

The application is dedicated to simulate millimeter wave (mmWave) channel estimation:

$$\text{mmCEsim} = \text{mmWave} + \text{Channel Estimation} + \text{simulation},$$

where reconfigurable intelligent surface (RIS), also known as intelligent reflecting surface (IRS) [1] is supported for multiple input multiple output (MIMO) systems.

Figure 1.1: mmCEsim banner.

We offer a task-oriented simulation software for researchers to focus on algorithms only without being bothered by coding.

1.2 Features

Here is a list of basic features of mmCEsim:

- Task-oriented mmWave channel estimation formulation;
- Customizable system model;
- Extendable algorithms with our designed ALG language;
- Multiple RISs support;
- Automatic report generation (in plain text and \LaTeX);
- Well-written documentation with examples and tutorials.

1.3 Algorithm Background

The task-oriented channel estimation for (RIS-assisted) mmWave MIMO systems is implemented with compressed sensing (CS), which exploits the sparsity of mmWave channels.

1.4 Software Implementation

Based on the algorithm background, we implement this software with command line interface (CLI), graphic user interface (GUI), web application and a VS Code extension.

Installation | 2

So far, there is no built binary for mmCESim since it is still under development. However, you may clone the GitHub repository and compile it yourself.

```
1 git clone https://github.com/mmcesim/mmcesim.git --recurse-submodules
2 cd mmcesim
3 cmake .
4 make
```

DOCUMENTATION

Every syntax and option in details.

CLI Application | 3

GUI Application | 4

Web Application | 5

The example web app page is shown in Fig. 5.1.

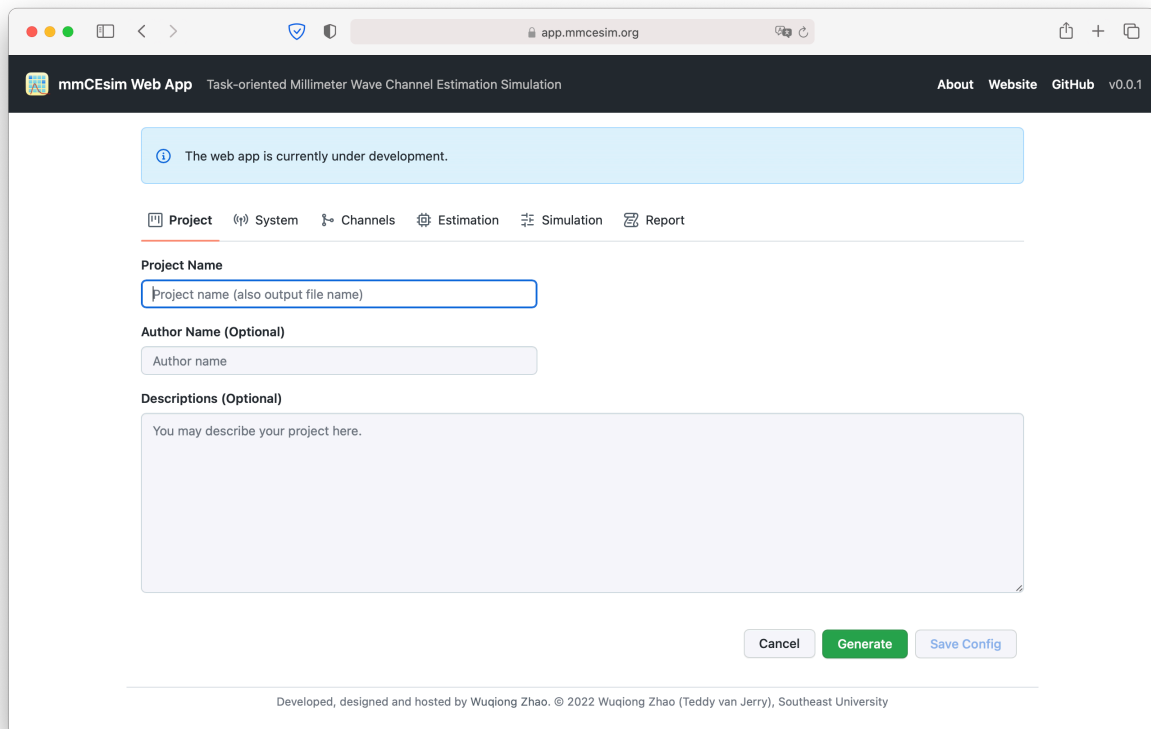

Figure 5.1: Web app interface.

6.1 Data Type

6.1.1 Why Need Data Type

Languages Python and Matlab/Octave are weakly typed which can be convenient for writing the code. However, that is problematic for implementation. The efficiency is not satisfactory compared to C++, and sometimes you may encounter ambiguous error information in Matlab. Therefore, for the sake of efficiency and generality, ALG language is designed to be **strongly typed**.

6.1.2 Structure

The type specification is very simple, because ALG language concentrates on matrices. Basically, the structure of ALG language is

prefix + dimension + suffix.

For example, f2c means a matrix (dimension is 2) with data type as float and property as a constant.

6.1.3 Specifiers

6.1.3.1 Prefix

Basic Type Prefix Basic type just names the element type. They are shown in Table 6.1.

Table 6.1: Basic type prefix.

| Predix | Type | C++ Type | Python Type | Matlab/Octave Type |
|--------|------------------|--------------------------|----------------------|----------------------|
| c | Complex | <code>cx_double</code> | <code>complex</code> | <code>complex</code> |
| f | Float | <code>double</code> | <code>double</code> | <code>double</code> |
| i | Integer | <code>int</code> | <code>int</code> | <code>int64</code> |
| u | Unsigned Integer | <code>uword</code> | <code>uint</code> | <code>uint64</code> |
| b | Boolean | <code>bool</code> | <code>bool</code> | <code>logical</code> |
| s | String | <code>std::string</code> | <code>str</code> | <code>string</code> |
| h | Character | <code>char</code> | <code>char</code> | <code>char</code> |

Alias Prefix Alias prefixes not only set the element type, but also the dimension. They are the one character alias for a two-character type.

6.2 Function

6.3 Calculation (CALC)

6.4 Macro

6.5 ALG Library

III

TUTORIALS

Step-by-step guide on using mmCEsim.

Millimeter Wave Channel Estimation

Millimeter wave channel estimation for multiple input multiple output (MIMO) systems techniques are discussed in [2].

APPENDIX

Additional information about mmCEsim.

Additional Resources

A.1 Publications

A brief introduction of mmCEsim is given in the [poster](#) at the 2022 National Postdoc Seminar in Nanjing, which I attend as the only undergraduate student, and got the Honorable Mention award.

This document is also published online at <https://pub.mmcesim.org/mmCEsim-doc.pdf>.

A.2 Websites

A.2.1 For Users

If you are the user of mmCEsim and wants to know more, you may find the following websites in Table A.1 useful.

Table A.1: Websites for users.

| Website | URL |
|-------------------|---|
| mmCEsim Homepage | https://mmcesim.org |
| Web Application | https://app.mmcesim.org |
| Blog | https://blog.mmcesim.org |
| Publications | https://pub.mmcesim.org |
| VS Code Extension | https://marketplace.visualstudio.com/items?itemName=mmcesim.mmcesim |

A.2.2 For Developers

If you are a developer and maybe want to contribute to the mmCEsim project, you can find additional websites in Table A.2.

Table A.2: Websites for developers.
